WIS 130/133 and Bridge Replacement Project:

SOUTH CHANNEL CLOSURE

BOATER GUIDE

- Follow the signage and navigational buoys placed in the river
- The bridge construction zone is a SLOW NO WAKE zone
- Boating is prohibited in areas during construction for safety
- Buoys will be relocated periodically as construction progresses
- The south channel will be CLOSED at the bridge construction zone for the majority of the boating season
- All thru traffic craft navigating beyond the bridge construction should use the north channel around Long Island
- The south channel will be open to Otter Creek Landing for upstream craft to offload
- When launching from Otter Creek Landing:
  - motorized craft will need to navigate around Long Island to the north channel in order to travel downstream beyond the bridge construction zone
  - a portage path is provided for paddle craft to be carried through the construction zone on Long Island if it is not feasible to navigate upstream to the north channel
