| December 2021 | COMPLETE                             |

\*Schedule is subject to available funding/INFRA grant.

## Project Scope Summary

|                                                                        |
|------------------------------------------------------------------------|
| Expand freeway to eight lanes with safety and operational improvements |
| Rebuild all old bridges over local roads                               |
| 7.5 miles total of reconstruction                                      |
| Rebuild 7 Mile Road interchange                                        |
| Construct new interchange at Elm Road                                  |
| \$175M-\$200M construction estimate                                    |

## Construction Impacts

|                                                               |
|---------------------------------------------------------------|
| Long-term lane and ramp closures                              |
| Signed alternate routes will be available to minimize impacts |
| Narrower lanes and shifting traffic                           |
| Materials and equipment hauling                               |
| Occasional overnight closures                                 |
