

Project BRIEF

I-94 North-South Freeway Project information

ABOUT THE PROJECT

- Stretches 35 miles between the Mitchell Interchange in Milwaukee, through Racine and Kenosha counties to the Illinois state line
- The \$1.9 billion project will expand the interstate to four lanes in each direction and redesign 17 interchanges
- Construction began in 2009

WIS 20 Interchange Reconstruction Begins mid-March 2015

The Wisconsin Department of Transportation (WisDOT) will continue reconstruction of the WIS 20 interchange this year as part of the I-94 North-South Freeway Project. Construction is scheduled to start mid-March 2015, with scheduled completion late fall 2015.

The WIS 20 Interchange reconstruction work this year will include:

- I-94 EAST (SB) mainline at WIS 20
- Entrance and exit ramps to and from I-94 EAST (SB)
- I-94 EAST (SB) Bridge over WIS 20

Construction on this project will take place in four phases.

Phase One (approximately one week)

- I-94 WEST (NB) will be reduced to two lanes from north of County C to south of WIS 20 as crews begin work on northbound and southbound lanes.
- Temporary signal will be added at County K exit ramp from I-94 EAST (SB).

Phase Two (approximately four months)

- I-94 EAST (SB) and I-94 WEST (NB) will be reduced to two lanes of traffic in each direction from north of County C to south of WIS 20 as crews begin work on southbound lanes.
- I-94 EAST (SB) traffic will shift to the east. Two lanes will remain open for both the north and south traffic from WIS 20 to north of County C on the current northbound lanes. All traffic will remain on the east side of the freeway until late fall.

- The I-94 EAST (SB) exit and entrance ramps will close.
- The I-94 EAST (SB) bridge over WIS 20 will be demolished and reconstruction of the southbound lanes will begin.
- Detour routes will be posted utilizing County K and WIS 11.
- WIS 20 under I-94 will have lane restrictions during this phase.

Phase Three (approximately four months)

- I-94 EAST (SB) exit ramp to WIS 20 will open during this phase.
- Temporary traffic signal at County K exit ramp will be removed.
- WIS 20 under I-94 will have lane restrictions during this phase.

Phase Four (approximately two to three weeks)

- I-94 EAST (SB) entrance ramp will open during this phase.
- Median lane closures will take place on I-94 to complete barrier wall work.
- All traffic will be shifted to their respective lanes on I-94 towards the end of this phase.

The project team thanks you for your patience and cooperation throughout this project.
