WIS 42 Reconstruction Project

Welcome to tonight's meeting! Thank you for taking time to attend and learn more about this project. This meeting is being held in an open-house format. You are encouraged to talk to our project staff, view exhibits and discuss the proposed improvements. A short presentation is scheduled for 5:40 p.m.

Project information

The project includes:

- Remove and reconstruct roadway from Country Walk Drive to Scandia Road.
- Improve vision of highway from Sister Bluff Drive to Bluffside Lane by lowering the roadway elevation.
- Realign WIS 57 intersection to improve intersection vision and usability.
- Increase width of Mill Road (East) intersection to accommodate for right turn only and left turn/straight through lane and for fire engine traffic.
- Add curb and gutter from County Walk Drive to Bluffside Lane to improve drainage.
- Increase width of roadway from County Walk Drive to Bluffside Lane to accommodate for bicycle traffic.
- Add sidewalk to north side of WIS 42 from County Walk Drive to Bluffside Lane.
- Change roadway configuration from Bluffside Lane to Mill Road to accommodate for shared bicycle/parking lane on west side and bicycle lane only on east side.
- Increase width of roadway from Mill Road to Scandia Road to accommodate for shared bicycle traffic/parking lane on both sides of highway.
- Replace and reconfigure storm sewer to improve drainage.
- Add underdrain pipe from Bluffside Lane to Mill Road to intercept water from hillside east of the highway.

The project is currently scheduled for construction from September 2014 to June 2015.

Traffic control

The roadway will be constructed under traffic with one travel lane maintained in a one-way direction. A local detour will be established for the traffic in the opposite direction. The direction of travel is undetermined at this time and input from the community is needed to make a decision. Access to businesses will be maintained.

May 22, 2012

Right-of-way

Additional right-of-way is required for this project for the realignment of WIS 57. There are several encroachments (such as signs and landscaping areas) within the right-of-way which will need to be moved prior to construction. Also, temporary limited easements will be needed in some areas.

Public comments

Attached to this handout is a sheet for your written comments. Please mail any comments before June 12, 2012, or simply drop it in the comment box tonight. The comment sheet is a pre-paid mailer.
