

Project BRIEF

WIS 67 Reconstruction Overview - 2016

The Wisconsin Department of Transportation (WisDOT) is scheduled to resume reconstruction of WIS 67 (Summit Avenue), including the WIS 67 bridges and ramps at the I-94 Interchange in March 2016, with scheduled completion fall 2016.

Construction on the project, scheduled to take place this year, is outlined below:

- Expansion of northbound WIS 67 from 2-lanes to 3-lanes between I-94 and Lexington Drive in addition to reconstruction of the roadway from Blue Ribbon Drive to I-94, and from Lexington Drive to just north of Thackeray Trail.
- Continue reconstruction of the WIS 67 northbound bridge over I-94.
- Reconstruction of the I-94 ramps east of WIS 67 and the WIS 67 (SB) entrance ramp (loop ramp) to I-94 EAST.
- Construction of a pedestrian tunnel under WIS 67 northbound at Oconomowoc Parkway (bike path connections to the tunnel will be constructed at a later date).

Construction to be completed during 2016 is scheduled to take place in two phases.

Phase One (approximately 5 months)

- WIS 67 northbound traffic will be shifted to the new southbound lanes from Thackeray Trail to Blue Ribbon Drive while crews construct the WIS 67 northbound lanes.
- Two lanes of traffic will remain open in both directions on WIS 67 from I-94 to Oconomowoc Parkway, while traffic will be reduced to one-lane in both directions from Delafield Road (County DR) to I-94 and Oconomowoc Parkway to Thackeray Trail.
- In order to reconstruct the roadway, certain side roads will require closures. Pabst Farms Circle, Valley Road (CTH B), Market Street and Lexington Drive will all close to the east of STH 67 (Pabst Farms Circle and Valley Road will not be closed concurrently).
- I-94 (WEST) exit ramp, WIS 67 (SB) entrance ramp (loop ramp) to I-94 EAST and I-94 (EAST) entrance ramp will close for a duration of approximately one-to-two months during the summer. Sawyer Road (County P) interchange and Delafield Road will be used for all detour routes during these ramp closures.
- Intermittent overnight lane closures and full freeway closures of I-94 EAST and I-94 WEST will occur while crews replace the WIS 67 northbound bridge over I-94.

Phase Two (approximately 1 - 2 months)

- WIS 67 traffic will be shifted to their respective lanes with two lanes of traffic in both directions from I-94 to Oconomowoc Parkway, while traffic will be reduced to one-lane in both directions from Delafield Road to I-94 and Oconomowoc Parkway to Thackeray Trail to reconstruct the WIS 67 median and turn lanes.
