Subject: WIS 21 Construction Update - WIS 21 & Leonard Point Road intersection
Date: Thursday, August 13, 2026 1:28:26 PM
Attachments: [WIS21-LP_Stage2.pdf](#)

Good afternoon. Progress continues on our WIS 21 improvements between Omro and Oshkosh. As you are aware, temporary signals have been in place at the WIS 21 & Leonard Point Road intersection since late July to accommodate alternating directions of traffic flow along the north leg of Leonard Point Road between WIS 21 and Pierce Lane. Access from old Omro Road to Leonard Point Road has been closed while our contractor has constructed a new tie-in between these local roads.

We are providing notice that our contractor will be moving to the second stage of the WIS 21 & Leonard Point Road roundabout construction this weekend. For this upcoming stage, we will reopen the connection from old Omro Road to Leonard Point Road while simultaneously closing access from WIS 21 to Leonard Point Road. This second stage will feature similar temporary signals to accommodate alternating directions of traffic flow along Leonard Point Road from old Omro Road to just north of Pierce Lane. Access from Pierce Lane to Leonard Point Road will remain closed. I've attached a visual for the second stage to hopefully provide a better idea of the Stage 2 traffic configuration.

This is the second of three stages to allow for the construction of the new multi-lane roundabout at WIS 21 & Leonard Point Road, and we expect this stage to extend until sometime in October. The third stage will maintain some local access restrictions but remove any temporary signals. Duration of the third stage is less certain and not described in detail within this note. Overall completion of the new multi-lane roundabout at WIS 21 and Leonard Point Road is expected sometime around the end of October.

If you have general questions on the traffic staging and local access, feel free to reach out. Please also continue to check our WIS 21 construction website at <https://projects.511wi.gov/21winn2025/> for updates.
