

COMMUNICATION GUIDE

Helping Businesses Thrive During Construction

Interstate 39/90 is vital to Wisconsin's economic future by serving as a major corridor for the transportation of people and commerce, as well as a gateway to many tourism and recreational destinations across Wisconsin. Reconstruction and expansion of I-39/90 is planned to improve safety and traffic congestion concerns from the Illinois state line to the US 12/18 interchange near Madison.

With any reconstruction project, the Wisconsin Department of Transportation (WisDOT) recognizes that businesses located in or near construction zones are faced with special challenges. It's critical that customers, employees and delivery vehicles have access to businesses and places of work, regardless of any roadwork inconvenience.

The *In This Together* program targets businesses facing road construction in their community. The program's goal is to help businesses maintain daily operations while construction is underway.

This packet is a tool WisDOT created for the business community and provides techniques and tips that have been successful in communities throughout Wisconsin to help maintain customer and employee access during road construction. This packet is meant to provide you with ideas as you prepare for road construction in your community.

PLAN AHEAD

Throughout the design phase, WisDOT holds periodic meetings with local officials and community residents to provide updates on the design of the project and gather feedback. By the time construction crews begin work, all of the design decisions have been made. Therefore, it is important for the business community to get involved early in the design phase and stay involved during construction. The following tips can help businesses better plan for construction:

- **Get involved early** by attending WisDOT public involvement meetings to learn about the project, ask questions and provide feedback.
- **Communicate** with WisDOT project managers to stay informed about project details, schedule and potential traffic impacts.
- Understand how construction will impact access to your business. Will there be changes to driveways or parking? Will work on interchanges impact traditional traffic patterns?
- **Develop a plan of action** that includes how you will communicate with your customers, employees and suppliers about road construction and traffic impacts.
- **Keep your customers informed** prior to and during construction. Make sure you have accurate contact information for all customers.
- Identify alternate routes to your business.
- Work collaboratively with other affected businesses in the area to share resources and ideas.

I-39/90 Project open house meeting.

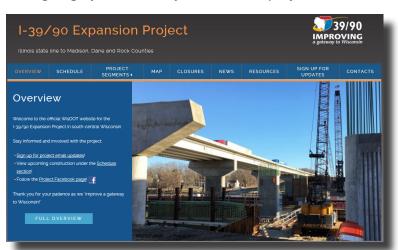

STAY INFORMED

It is important for businesses to understand why I-39/90 is being expanded, why there may be some inconvenience during reconstruction, what alternative solutions were evaluated and what steps are being taken to minimize negative impacts.

Businesses can stay informed by:

- Attending public involvement meetings during the design phase and other meetings just prior to construction.
- Visiting the I-39/90 project website (<u>www.i39-90.wi.gov</u>) and Facebook page (<u>Facebook.com/WisconsinI3990Project</u>) for updates.
- Inviting WisDOT representatives to discuss the project at your business association or group meetings.
- Sharing what you've learned with other business people, using letters, newsletters, social media, ads and other techniques to make the community and your customers more aware of what's ahead.
- Staying in touch with WisDOT project staff once construction begins.
- **Establishing a line of communication**. Call the project staff if you have questions. An effective method is to establish one of your business association members as a point person to collect questions or concerns from the membership and share them with project staff. These people will also be responsible for updating the association on what they have learned.
- Signing up for email updates on the project website.

COMMUNICATE WITH CUSTOMERS

Drivers who are well informed about road construction are generally tolerant of traffic disruption. They know about construction before they leave home, rather than being surprised by the sudden appearance of barricades, orange barrels and/or road closed signs.

The following tips can help you keep customers coming through your doors:

- Put up signs that point the way to your business. When appropriate, WisDOT permits businesses to temporarily post signs in the highway right of way to reassure customers that businesses are accessible. Contact the project manager to determine if this is appropriate for your business and to obtain signage guidelines. Please make certain your sign complies with WisDOT guidelines. Also coordinate with your local municipality for additional advertising guidelines.
- Use simple maps to tell your customers about the best alternate routes to reach your business. Post them on your doors and bulletin boards, upload them to your website, insert them into mailings and distribute them to your customers.

Notice of road construction on Coachman's Golf Resort website.

- Add your business to a list of area businesses promoted on the I-39/90 Expansion Project website, <u>www.i39-90.wi.gov</u>, under the Resources Tab.
- Add directions to your voicemail or keep a script with directions to your business next to the phone so employees can explain to customers how to reach your business.
- Use Facebook, Twitter and other social media to provide updates to customers and remind them you're open for business.
- Let the public know you're open for business. Develop advertisements for newspaper, radio or television. Consider pooling your resources with other businesses for possible group advertising rates.

Businesses can take basic actions to not only survive, but thrive, during road construction:

- Plan ahead as much as possible; get involved early. The further out you plan, the more prepared you will be.
- Form an alliance with other businesses in your area. Pool resources to purchase group advertising.
- Attend WisDOT's public involvement meetings to increase your knowledge about the project and to provide feedback.
- Hold regular and frequent meetings with other businesses to share strategies and support. Write down your concerns and questions for discussion.
- Hold a pre-construction meeting with the WisDOT project manager and contractor to find out how long the project will take and what to expect (i.e., dirt, mud, noise, ground shaking, lane closures, etc.).
- Meet the on-site project manager. Keep his/her telephone number in a handy place.
- Establish a line of communication with the project manager this is the person who coordinates directly with the contractor.
- Stay positive! Customers do notice.

Brainstorm ideas to promote your business and creatively communicate with customers:

- Hold events prior to construction to draw attention to the area.
- Design a logo for all affected businesses to use during construction.
- Hold special promotions such as free hot dogs and refreshments, or a one-day sign-up for a giveaway.
- Print placemat advertisements.
- Place advertisements in outlying newspapers.
- Sell hard-hat lunches to go.
- Start a delivery service during construction.

ROAD CO	DNSTRUTION
NOW	HIRING

Businesses near the I-39/90 and WIS 59 interchange let customers know they were open during construciton.

12 to 18 months before construction

- □ Conduct first meeting with WisDOT staff responsible for project design. Discuss the *In This Together* program and participate in question and answer session.
- Discuss access during construction and other issues.
- □ Form an association/group of businesses that will be impacted by the construction project. Determine who will lead and coordinate efforts for the community.
- **G** Form committees for signing, advertising, promotions, special events, etc.
- Develop promotional campaign:
 - Adopt theme
 - Design and produce newspaper, television, and radio advertisements
 - Brainstorm and produce additional promotional materials
 - Plan special events

3 to 6 months before construction

- **C** Conduct second meeting with appropriate WisDOT staff and business owners.
- Discuss In This Together progress.
- □ Begin work on sign development. Be sure to coordinate with WisDOT.

1 month before construction

- **C** Conduct third meeting with community leaders and business owners.
- D Obtain latest available information regarding project from WisDOT.
- Discuss access during construction, project schedule, and other outstanding issues.
- □ Complete work on signing development.
- □ Arrange for installation of signs to coincide with the start of work and/or any detours. Be sure to coordinate sign location with WisDOT.

After construction begins

- □ Attend construction business meetings. (WisDOT project leader will arrange.)
- □ Continue committee work as appropriate.
- □ Stay positive! Customers do notice.
