US 10/WIS 114 construction complete in Calumet County

Improvement project finishes on time and on budget

(Chilton WI) – The Wisconsin Department of Transportation (WisDOT) Northeast Region announces completion of construction on 4.1 miles of US 10 between WIS 114 in the city of Menasha and County N in the village of Harrison, Calumet County. Construction on the \$4.2 million contract began June 8, 2026. Work finished on time and on budget.

Project Improvements

This was a resurfacing-level improvement that included the following improvements:

- Repair and grind concrete pavement from WIS 114 to Fire Lane 7 to improve driving conditions
- Repair concrete pavement and place an asphalt overlay from Fire Lane 7 to County N
- Resurface all asphalt shoulders on US 10
- Replace spot sections of curb and gutter
- Upgrade curb ramps to meet ADA standards at County LP and Oneida Street, as required
- Replace guardrails to meet current standards
- Repair drainage features (cleaning culverts, replacing endwalls, minor ditch grading and one culvert replacement)
- Install new pavement marking and replace shoulder rumble strips to maintain safety
- Resurface the asphalt pavement at the County N Park and ride.

Anticipated Benefits

Improvements will result in the following benefits:

- By repairing and grinding the deteriorating concrete pavement, applying an asphalt overlay where needed, and resurfacing the asphalt shoulders, the project will provide a smoother, more comfortable ride while reducing vehicle wear and driver fatigue.

- Replacement of outdated guardrails to current standards, installation of new pavement markings, and refreshed shoulder rumble strips will enhance overall roadway safety and help prevent run-off-road incidents.
- Upgrading curb ramps to meet ADA standards will substantially improve accessibility and safety for pedestrians, including those using wheelchairs, walkers, or canes.
- Drainage improvements will reduce the risk of flooding and pavement undermining.

Collectively, these upgrades will extend the service life of the pavement and associated infrastructure, lower long-term maintenance costs, support reliable travel for commuters and freight, and improve the functionality of the County N Park & Ride facility for the benefit of the surrounding communities.
