

# Construction Information Handout

**WIS 28**  
**Onion River Tributary**  
**Sheboygan County**

**Project ID: 4010-28-71**

**WIS 28**  
**WIS 57 – County A**  
**Sheboygan County**

**Project ID: 4010-29-71**

**May 2026**

Please see the construction project website for detailed scope, schedule and traffic impacts at

<https://projects.511wi.gov/wis28onionbridge/>

Please see the Northeast Region Weekly Construction Advisory for weekly construction updates during construction at

<https://projects.511wi.gov/weeklyupdates-ne/>

## Purpose of handout

The purpose of this handout is to provide information about the upcoming construction scope, schedule, traffic impacts, business resources and project contacts.

## Project purpose and need

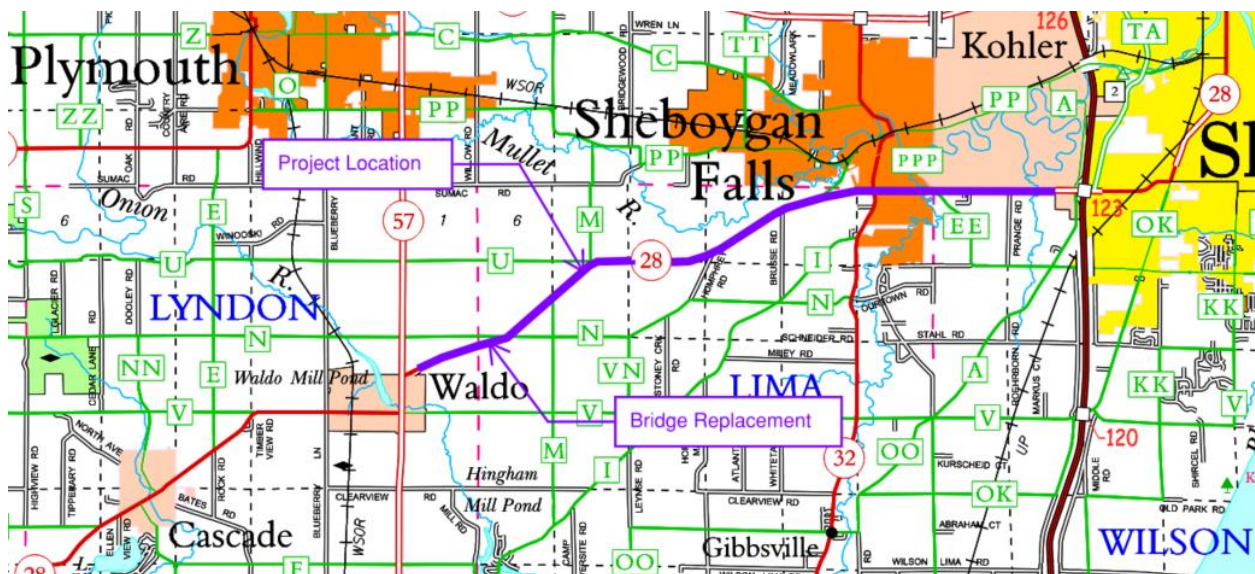

We are improving 8.9 miles of WIS 28 in Sheboygan County. The culvert structure at the tributary to the Onion River located 0.25 miles southwest of the WIS 28 and County A intersection is beginning to deteriorate, and the pavement is experiencing cracking, weathering, and rutting. In addition, the curb and gutter at the roundabout at WIS 28 and WIS 32 is in need of replacement, and the guardrail along the corridor has reached the end of its service life. Run off the road crashes were also identified along the corridor.

## Anticipated benefits

- This project will extend the service life of the pavement by addressing current deterioration through milling and overlaying with new asphalt, along with a bridge replacement, and replacement of aging guardrail.
- This proactive rehabilitation will reduce long-term maintenance costs by preventing more severe future damage and the need for costly full reconstructions.
- Motorists will experience smoother, more comfortable driving conditions on refreshed pavement, while the updated features, such as modern guardrails, widened paved shoulders, and rumble strips enhance overall roadway safety.

## Project location

The project will take place on WIS 28 from WIS 57 in the town of Lyndon to County A in the village of Kohler, Sheboygan County.

## Project improvements

This is a bridge replacement and resurfacing-level project. Project improvements include:

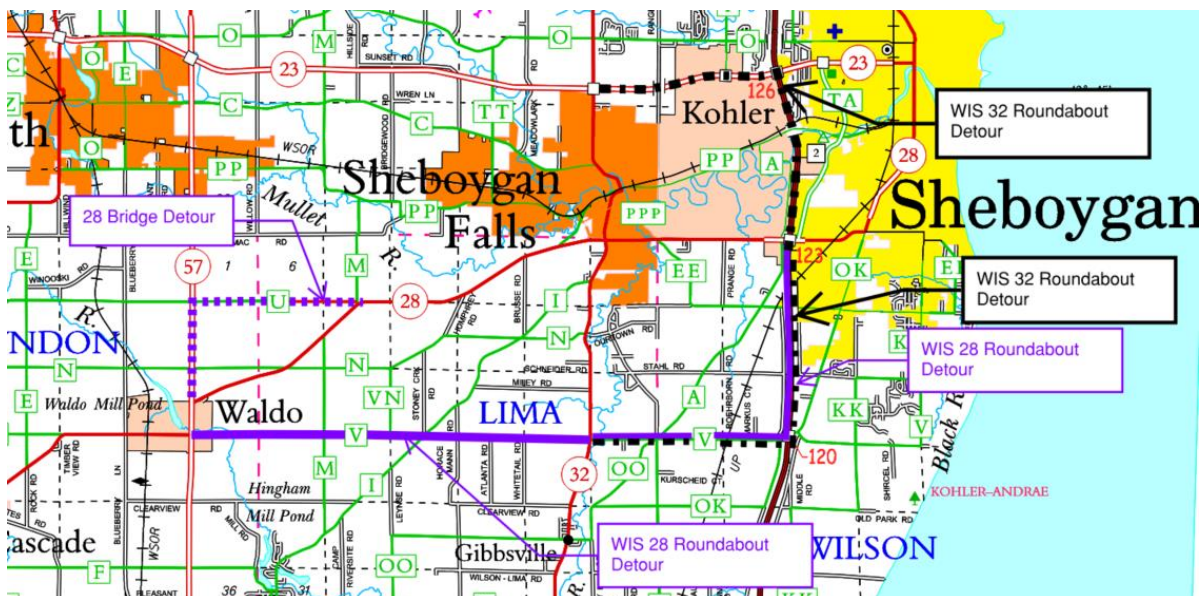

- Remove the deteriorated culvert structure at the Onion River Tributary and replace it with a bridge structure
- Mill 4" of deteriorated pavement surface, and overlay with 4" of new asphalt pavement
- Widen the paved shoulder from 3' to 5'
- Replace the curb and gutter in the roundabout at WIS 28 and WIS 32.
- Replace aging guardrail
- Provide centerline and shoulder rumble strips

## Schedule and construction staging

- July 2026: Anticipated Construction Start
- October 2026: Anticipated Construction Completion

## Traffic impacts

- WIS 28 will remain open to two-way traffic, except when a two-week detour is in place as described below. Local access to adjacent properties will be permitted at all times and communicated with property owners. Traffic on WIS 28 may be reduced to one-lane with flaggers.
- WIS 28 between WIS 57 and County N will be closed to through traffic for two months during bridge replacement.
  - The WIS 28 detour route will utilize WIS 57 and County U.
- The roundabout intersection of WIS 28 and WIS 32 will be closed for curb and gutter replacement and paving operations.
  - The WIS 28 detour will utilize WIS 57, County V, and I-43.
  - The WIS 32 detour will utilize WIS 23, I-43, and County V.

### **Temporary Business Signing** (if needed)

Temporary business signing may be placed during the detoured portion of the project by filling out a WisDOT temporary business signing permit. The permit is free. All temporary business signing needs approval via the permit before placement to ensure it is in a safe location and does not pose a visual distraction or traffic hazard. Costs associated with creating the temporary signing are the responsibility of the business.

Please keep the following items in mind regarding business signing:

- Temporary business signing cannot be placed on traffic control devices or state signs.
- WisDOT encourages businesses to team up and have multiple businesses listed on one sign structure versus several individual signs. This makes it easier for travelers to identify signs and find their destination.

Temporary Business Sign permits are available as a fillable-form WORD document or standard pdf file download on the project website. You can also request one from the WisDOT Project Manager, via email or phone ([timohty.vehragen@dot.wi.gov](mailto:timohty.vehragen@dot.wi.gov) / (920)-362-1267)

- Please email the completed permit to Timothy Verhagen, or if you prefer to mail the completed form, please address to: Timothy Verhagen, WisDOT NE Region, 944 Vanderperren Way, Green Bay, WI 54304.

### **WisDOT Resources for Businesses** *(include on all construction handouts)*

WisDOT recognizes businesses located in work zones have special needs. While signing and other marketing/advertising during the construction is up to the business, WisDOT has business resources available through its “In This Together” website to assist businesses with planning for construction closures and to minimize the impact of construction. For more information, please visit WisDOT’s In This Together website at <https://wisconsin.gov/Together>

### **Project contacts**

The project will have an onsite construction office and onsite construction manager. For all construction questions while work is taking place, please call or email the construction project manager or arrange a time to come to the construction office.

Janelle King  
Construction Project Manager  
920-251-3483 and [jking@correinc.com](mailto:jking@correinc.com)

For any other questions, please contact the WisDOT Project Manager.
